

HCL INTERNSHIP – MINI PROJECT

ALUMNI MANAGEMENT SYSTEM

SOWMIYA S

39120117

B.TECH-IT

Abstract:

The project's major goal is to create a connection between alumni and the institution; a system that can maintain alumni data for an institution and allow easy access to it. Alumni will also want to retain contact with their alma maters. Alumni can share their accomplishments and other information with the institution by posting them on the site. All data will be received by the administrator and shared with the institution's authorities.

Objective:

The major purpose of the project is to increase alumni-alma mater contact. Alumni will want to keep in connection with their alma mater, and institutions will also want to keep in touch with their alumni; the system can be utilized for both. The system will be able to handle the institution's alumni data and enable easy access to it. This will reduce the amount of manual work. The system will have an easy-to-use interface.

Users:

- Alumni
- Admin (Institution side)

Technologies:

- Front-end : HTML, CSS, JavaScript

- Back-end: JavaScript , PHP, MySQL

Project Modules:

Alumni:

Before accessing the system, alumni must register first. Alumni will have access to all upcoming events and will be able to register for them. The photo gallery allows alumni to relive their memories. They will have the ability to post jobs through the site. Alumni can contact the admin with queries.

Admin:

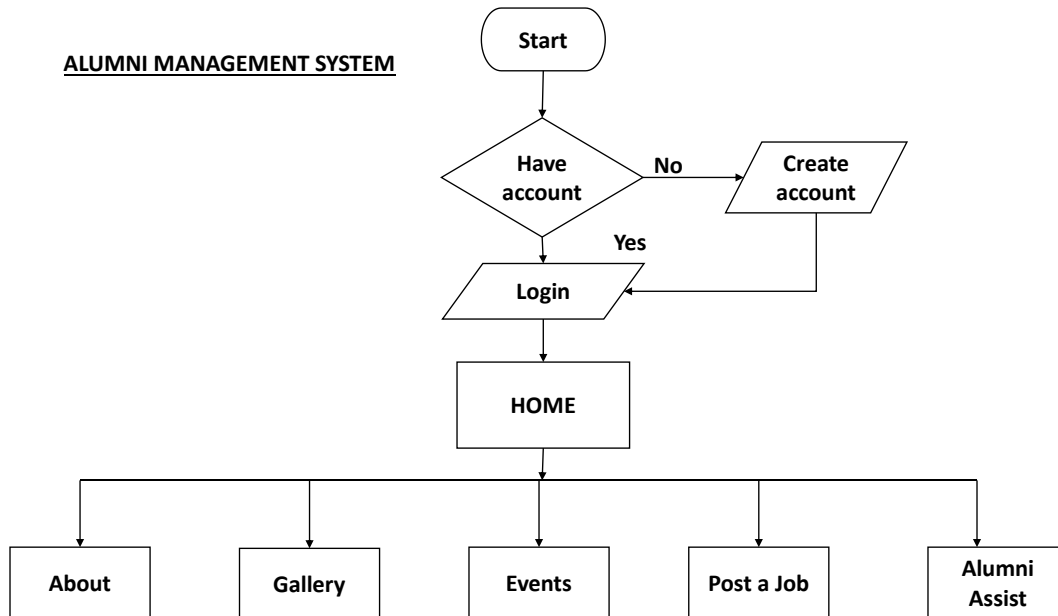

The admin will have complete control over the system. Post registration, they must validate the alumni's account. The admin will gather all of the job postings made by alumni in the site and then proceed with the process. They will have the ability to post and edit all the events.

Features:

- Login page
- Photo Gallery
- Upcoming Events
- Post a Job
- Alumni Assist
